**Bible**

- Students will learn that Bible accounts are facts.
- Students will learn of their need for Christ as personal savior.
- Students will learn how to share the plan of salvation with others.
- Students will use application stories to apply Bible lessons to daily life.
- Students will learn the principles found in weekly memory verses.
- Students will learn that God’s Word has relevance to every part of their lives.
- Students will learn how to use their Bibles to find information and interpret meaning.
- Students will learn the books of the Bible.
- The students will study the life of Jesus and the early church.
- Students will study and use Bible vocabulary.

**Language Arts**

- Students will learn to recognize and write complete sentences.
- Students will learn to recognize and write declarative, interrogative, imperative, and exclamatory sentences.
- Students will learn rules of capitalization and punctuation.
- Students will learn how to use words and apostrophes to show possession.
- Students will learn how to use quotation marks, commas, and end punctuation marks.
- Students will be able to change singular words to plural.
- Students will recognize and write contractions.
- Students will recognize and use synonyms, antonyms, and homonyms.
- Students will learn the differences and how to use nouns, verbs, adverbs, conjunctions, interjections, pronouns, and adjectives.
- Students will learn how to distinguish subjects and predicates.
- Students will learn to write sentences that have correct subject/verb agreement.
- Students will learn how to identify adjectives (comparative and superlative) and use them correctly in a sentence.
- Students will learn the differences of adjectives and adverbs.
- Students will use the correct verb tenses in a sentence.
- Students will be able to recognize and use subject and object pronouns.
- Students will be able to recognize possessive pronouns and use them correctly in a sentence.
- Students will identify and use linking verbs correctly in a sentence.
- Students will be able to identify common and proper nouns by demonstrating correct punctuation of each.
- Students will be able to write compound and complex sentences, using conjunctions.
- Students will be able to punctuate dialogue correctly in a sentence, using commas and quotation marks.
- Students will know the difference between formal and informal English.
- Students will be able to use interjections and prepositions correctly in a sentence.
- Students will be able to capitalize book titles correctly.
- Students will learn to spell words based upon special sounds/patterns.
- Students will apply phonics rules to spell words.
▪ Students will have formal instruction in cursive handwriting.
▪ Students will read from different genres, including fiction, non-fiction, poetry, informational, and realistic fiction.
▪ Students will learn how to identify main ideas in appropriate grade-level texts.
▪ Students will learn how to infer in appropriate grade-level texts.
▪ Students will learn how to ask questions, visualize, summarize, compare, and contrast in appropriate grade-level texts.
▪ Students will learn how to predict and make connections within appropriate grade-level texts.
▪ Students will learn how to determine importance, and to re-read to clarify, in appropriate grade-level texts.
▪ Students will learn how to decode elements of non-fiction texts, including headings, subheadings, captions, text boxes, indexes, and glossaries.
▪ Students will learn and write the parts of a friendly letter and learn to address an envelope.
▪ Students will compose different types of poetry.
▪ Students will learn about the writing process. They will learn how to write narrative, informational, and opinion pieces.
▪ Students will learn the mechanics of writing and how to implement them in their pieces.

**MATHEMATICS**

▪ Students will apply properties of operations.
▪ Students will learn place value through the ten-thousands.
▪ Students will learn and apply estimation, both as a problem and as a checking strategy.
▪ Students will learn about how to add, subtract, and multiply with money. There will be a focus on how to use it in real life situations through word problems.
▪ Students will review addition and subtraction using one-, two-, three-, and four-digit numbers.
▪ Students will memorize the times tables through 12. They will learn how to multiply by one- to three-digit numbers.
▪ Students will memorize division facts up through 12. They will learn the steps of long division with one-digit divisors. They will also learn how to check their work with multiplication.
▪ Students will review how to tell time to the minute. They will learn how to calculate elapsed time, as well as start and ending times, through word problems and manipulatives.
▪ Students will use customary and metric measurements to measure. They will learn how to measure with linear measures, as well as volume and masses. Linear measurement will be to the nearest ½ and ¼ inch.
▪ Students will solve algebraic expressions and will identify unknown whole numbers in equations, relating to three whole numbers.
▪ Students will review fractions and decimals. They will be able to explain what they represent. They will be able to add and subtract fractions with mixed numbers. They will understand how a fraction and a decimal mean the same, but they are written differently.
▪ Students will compare fractions and identify fractions that are equivalent.
▪ Students will create and interpret different types of graphs (pie, vertical and horizontal bar, line and pictographs).
▪ Students will review geometric shapes and symmetry.
▪ Students will learn how shapes can flip, turn, and slide.
▪ Students will apply word problem strategies to help them solve real-world problems.
**SOCIAL STUDIES**

- Students will study famous people from American history who have made a positive difference.
- Students will learn principles of government and why government is important, how people are governed, and how people (citizens) affect communities.
- Students will learn the 50 states and the location of each state on a map.
- Students will learn how environment affects culture.
- Students will learn specifics of culture in the following locations: The United States, Canada, Mexico, and the Caribbean.
- Students will learn how Canada, Mexico, and The Caribbean are unique and different.
- Students will learn principles of economics and how people interact, why resources are important, why money is important, and how scarcity affects trade.
- Students will identify major rivers and mountain ranges.
- Students will locate the Equator and Prime Meridian.
- Students will know the difference between latitude and longitude.
- Students will study Greece and the impact it has had on Western culture, including democratic governments.
- Students will learn about the rights of American citizens.
- Students will learn about current events.

**SCIENCE**

- Students will learn that water dominates our planet, changes the face of the land, and defines life.
- Students will investigate the properties of water and how it changes when heated, cooled, and frozen.
- Students will understand the water cycle: evaporation, condensation, precipitation, and runoff.
- Students will explore new technologies being engineered to conserve and protect natural resources.
- Students will compare weather data they collect to meteorologists’ forecasts and historical weather data.
- Students will study ecosystems and the balance of nature in food chains.
- Students will learn about plant cells and the plant life cycle.
- Students will study plant varieties in order to classify them.
- Students will learn about rocks and minerals.
- Students will learn about the solar system.
- Students will explore a variety of forces and how strength and direction of force impact the change in motion.
- Students will explore magnetism and gravity.
- Students will use a variety of systems to explore patterns of motion.
- Students will use the engineering design process to refine their scientific understanding of motion and matter.
- Students will experiment with mixtures and solutions to extend their understanding of conservation.
